

BEGINNER AMATEUR CONNOISSEUR

Foreword

ORCHIDS, like people, differ. With plants, however, the Horticulturist is able to control the variation to a degree and by the use of certain proven parents can predetermine the variations—shape or form of flower, color, and many other hereditary factors.

THE amateur grower should bear in mind the great importance of selecting orchids which represent, generically, the traits which he desires in flowers. As we have pointed out so many times before, poor orchids require the same time to produce as good ones; therefore, do select your orchids cautiously, so that you can be proud of your plants when they bloom.

THE hybrids which we offer represent the finest and are the results of the work of the leading hybridists of the world. The parents used in these hybrids were carefully selected for outstanding qualities. And we believe that the merit of the resulting flowers will bring you many hours of enjoyment.

WE have tried to give you a brief description of what may be expected as to color and season of flower; however, it is difficult to describe accurately the color variations that may be expected in a fine orchid hybrid, since they cover such a wide range.

THE beginner is often confused as to the selection of plants which are suited to his given growing conditions; if we can be of assistance in any way in making your selections, we'll gladly help.

CATTLEYAS AND ALLIED GENERA

(UNFLOWERED)

LAVENDER - WHITE WITH COLORED LABELLUM - WHITE - YELLOW

We offer the following crosses as unflowered seedlings. Plants in $3 \, V_2{}''$ pots will flower in about a year, while those offered in 5'' pots are in sheath or will make sheath on the next growth. This is an opportunity to buy outstanding hybrids in large sizes, yet have the pleasure of seeing them flower for the first time.

You will note that we have indicated some hybrids to be "light controllable." This means that by the use of additional light plants may be flowered at times different from their normal flowering season.

In some instances we may be sold out of a given size and ask that you give us a second choice or permission to substitute a cross of equal quality.

CATTLEYAS AND ALLIED GENERA

FLOWERING SIZE PLANTS

It is difficult to enumerate all of the fine hybrids we have in our collection, but we are listing some of the selected flowering plants, which we are sure will interest our customers.

Plants differ in size, although pot sizes may be the same, and quality, of course, is also a factor; therefore, we have indicated a fair spread in price for evaluation of size and quality. These plants are all divisions of our flowering plants.

If you are interested in other hybrids, we invite your correspondence.

CHARLES P. SLOCUM SHOWN IN THE HOUSE OF FLOWERING-SIZE HYBRIDS.

LC. SARGON (Lc. Lustre x C. Hardyana) \$25-\$30

A very fine floriferous Cattleya. Habit of growth is similar to C. gigas in that it requires good light for best flowering. Labellum is very dark. 5" and 6" pots; season May-June.

C. DAVID FAIRCHILD (C. Dupreana x C. Loddigesii, violacea)\$25-\$30

A lovely bifoliate Cattleya; excellent producer and vigorous grower. Blooms spring, summer and early winter. Generally flowers twice a year. 5" and 6" pots.

LC. JAY MARKELL (Lc. Cynthia, F.C.C.R.H.S. x C. May Markell)\$25-\$40

A fine hybrid; white sepals and petals, dark labellum. One of the best of the whites with colored lips. Season, winter. $5\,1/2\,1''$ and $6\,1/2\,1''$ pots.

LC. JAY MARKELL var. Sam Sharpe, A.M.A.O.S. 1953

C. OLD FORESTER (C. Charybdis x C. Enic	d)\$25-\$40
	and heavy substance. Flowers are large and mauve. One of the lovely new modern tering, $5 \frac{1}{2}$ " and 6 " pots.
LC. IMPERIAL SUGAR (Lc. Hilary, F.C.C.R	R.H.S. x C. Mt. Royal)
Very floriferous and a good grower. Mediu blooms. 5 1/2" and 6" pots.	m-dark lavender flowers for winter to spring
LC. MARIE WEBB (C. Nutley, alba x Lc. N	Mab)\$20-\$35
A large, fall-flowering white with colored dark markings on the tip of the labellum. $5V_2$	labellum; beautiful gold-veined throat with $_2$ " and 6 $1\!/_2$ " pots.
BC. MARTHE GRATIOT X LC. PENSHURST	\$25-\$30
	ype flowers. Flowers have heavy substance y vigorous grower. Season, fall and winter.
	BLC, MARION RYERSON
	(Lc. Linnaeus T. Savage
	x Bc. Hartland)\$25-\$50
	One of the modern hybrids of Bc. Hartland which is proving to
	to be one of the fine new par-
	ents. Flowers are dark and of heavy substance. In our climate,
	we flower most of these plants twice a year. Season, fall and winter.
	N.C. MARION BYFREDN
Land the second of the second	BLC. MARION RYERSON var. Homestead

C. NELL MONTGOMERY (C. Gaskelliana, alba x C. Ben Nevis)
A fine winter producer; plant "breaks" very freely, so fine specimen plants are possible in small pots. Flowers are white with yellow throats. $5''$ and $5\frac{1}{2}''$ pots.
C. ENID VAR. ALBA (C. Mossiae, Reineckiana x C. Gigas, F.M.B.)\$20-\$30

Exceptionally floriferous. Beautiful large orchids with white sepals and petals and mottled purple labellums. A "must" for any collection. Excellent grower. Season, winter. 5" and 6" pots.

A fine bifoliate Cattleya. Flowers, borne on heavy stems, have beautiful dark label-lums. We have had as many as 14 flowers to the stem. We are offering a few divisions of this hybrid. (This was pictured on the June '53 issue of the A.O.S. Bulletin.) Season, spring, summer, fall. 5'' and $5\frac{1}{2}$ " pots.

C. MARIAN FAIRCHILD

ALL the pages of our orchid catalog!

We grow so many fine plants of so many different genera that we could not possibly list them all. We invite your correspondence when you have something particular in mind, for we feel sure that we can help you with your needs and on any growing problems you may have.

OUR COLLECTION INCLUDES:

Angraecums Brassavolas Cattleyas Cycnoches Diacrums Cypripediums
Dendrobiums
Epidendrums
Oncidiums
Peristerias
Laelias

Phaius Phalaenopsids Rodriguezias Vandas Vanillas

CYPRIPEDIUMS

The Cypripediums ("Lady Slipper Orchids") are easy to grow. Their magnificent flowers of brown, rose, green and red colors will last for several months in perfection.

Cypripediums offered here prefer a temperature of 60° F. or more. They do not like strong light and will do better if given a shaded location with 800 - 1200 ft. candle light. They can be grown well in conjunction with Phalaenopsids.

Cypripediums like plenty of humidity and are benefited by light syringings of water overhead. Applications of bonemeal and lime are advantageous. Plants may be divided and repotted after they flower.

CYP. ASHBURTONIAE VAR. SUPERBA (Cyp. barbatum x Cyp. insigne), flowering size \$15.00
A brown Cypripedium; flowers are borne on long stems, a nice plant to flower in fall.
CYP. BINGLEYENSE (Low's strain) (Cyp. Charlesworthii x Cyp. Harrisianum), flowering size
A dark red type, flowering during early winter. Good for the Christmas Season.
CYP. HARRISIANUM (Cyp. barbatum x Cyp. villosum), flowering size
Brown colored Cypripedium, flowering during winter.
CYP. INSIGNE VAR. SANDERI Species Annam \$7.50
Honey-yellow in color. Dorsal-sepal white margined with a few minute brown spots at the base. 4 " pot .
CYP. MAUDIAE VAR. MAGNIFICUM (Cyp. callosum, Sanderae x Cyp. Lawrenceanum, Hyeanum), flowering size
This is perhaps one of the favorites in the entire group of Cypripediums. A beautiful shade of light green. The dorsal sepal is white with light green lines. Flowers during various seasons of the year.
CYP. MORFAUANUM (Cyp. callosum x Cyp. superciliare), flowering size \$15.00
A good-size flower of beautiful coloration. Dorsal sepal is white with green veinations and a suffusion of pink to lavender in the ventral sepals. Dark spots on ventral sepals.

CYP. NEREID (Cyp. Alma Gavaert x Cyp. callosum), flowering size \$15	5.00
Another fine green Cypripedium, flowering during the winter season. A good green for St. Patrick's Day flowering.	
CYP. ST. ALBAN (Cyp. Antigone x Cyp. Harrisianum), flowering size \$7.50 - \$10	0.00
A nice, dark red Cypripedium to flower during late winter.	
CYP. ST. HILDA (Cyp. Boxallii x Cyp. Curtisii), flowering size \$10	0.00
A pink Cypripedium to flower during the winter.

One each of these five, flowering size Cypripediums for \$35

DENDROBIUMS

This genus contains some of the finest of the spray orchids. They are of easy culture, although one must be aware of the particular requirements of each species in order to be successful in flowering them.

Dendrobium phalaenopsis and all of its varieties should be grown in the Cattleya house and given as much sun as possible without burning the foliage. Give the plants plenty of water when they are growing. When not in growth, withhold some of the water and give only enough to keep the plants from shriveling. Weak applications of liquid fertilizer are advantageous when the plants are in growth.

D. AGGREGATUM VAR. MAJUS

The bright yellow flowers of this little Dendrobium are most welcome in any greenhouse during the spring months. It is a small plant — pseudobulbs are 3-5'' long and the leaves are about the same size. The profuseness of blooms dwarfs the plants when they are in flower.

3" \$ 7.50

4" 10.00

D. JACQUELINE THOMAS (D. Gouldi, Tulagi x D. phal. Mauna Kea)

This is a most interesting cross, as it is made with the all-white form of D. phal. Mauna Kea as well as the pink-labellum type. D. Gouldi, Tulagi was collected from Guadal Canal and is one of the finest types in existence. We flowered these hybrids and they have vivid lavender flowers of medium size. Free flowering, as each lead will make one or more long flower spikes after it has completed its growth.

4" 7.50

D. AGGREGATUM

D. PHALAENOPSIS VAR. DELICATA

15.00

An evergreen type of Dendrobium. Flowers are produced on sprays from the terminal end of the long canes. Background white with lavender to purple suffusion on sepals and petals. Season, Sept.-Jan.

Flowering size.

DENDROBIUM PHALAENOPSIS

D. PHALAENOPSIS VAR. DELIGHTFUL

Flowers very light; background white with less intense coloring than the variety "delicata". Sept.-Jan. Flowering size.

\$15.00

D. PHALAENOPSIS VAR. SCHROEDERIANUM (Dixon's variety)

The finest variety of colored D. phalaenopsis we have ever seen. Extremely dark flowers; in some cases the sepals are tipped with white, making a beautiful contrast. Canes grow to 8 feet in height and produce sprays of over 20 flowers, lasting for weeks. Our stud plant has produced as many as 10 sprays of flowers in a season. An excellent plant for use as decoration or cut flowers. Sept.-Jan.

3" 7.50

5" 15.00

D. PHALAENOPSIS VAR. WHITE FOAM

We are offering two hybrids of this white-flowering Dendrobium. Cross No. 411 is an all-white form, while Cross No. 412 is an all-white form with a labellum of pastel pink. Fall flowering.

CON CONTROL CO

PHALAENOPSIDS

SHOWER OF PHALAENOPSIDS
AT ORCHIDGLADE,
FEBRUARY, 1953

We are not listing any Phalaenopsids crosses in our catalog this year as sales during the past two years have exceeded our output. Consequently, we have greatly reduced our stock unintentionally.

If you are interested in plants of this genera, please write us as we will have a limited stock to offer. Next year, we hope to offer many new crosses again.

VANDAS

No orchid grower can afford to overlook this fine group of orchids. They are fast becoming one of the leading types of spray orchids. The flowers are of good size, generally up to 6" in diameter and the flat-type flower lends itself to all types of uses — corsage, cut flowers for arrangements, or display on the plant.

We flower many of these types as many as six times a year. From experience, we find that the growers in areas where sunshine is a limiting factor, require a good deal of time to grow small plants to the flowering size.

Therefore, this year, we are offering for sale only one size plant, except where noted, which will bloom in about a year's time.

Vandas are generally potted in larger containers than Cattleyas or other genera of similar size, so we recommend that the plants be shipped to you bare root for you to pot in suitable containers on arrival. We recommend charcoal or some inert rock as a potting media. If you want us to ship in pots, please advise.

BRASSAVOLA NODOSA

CATTLEYA SPECIES

Following we are offering 8 Cattleya species, desirable for their exact flowering season and a "best buy" for anyone who wants to start growing orchids.

C. GASKELLIANA Venezuela

Medium-sized flowers in the lighter lavender tints, blooming in the summer. \$ 5.00

C. GIGAS Colombia

Good-sized flowers in the lighter lavender tints, blooming early summer.

5.00

C. LABIATA Brazil

Good-sized flowers mostly in the darker tints of lavender; light controllable; fall blooming. \$5.00-\$10.00

C. MOSSIAE Venezuela

Spring bloomers—nearly each year blooming for the Easter Holidays.

\$ 5.00

C. PERCIVALIANA Venezuela

Medium, light lavender flowers with a vivid dark-colored labellum, blooming around Christmas and New Year's.

\$ 5.00

C. SKINNERI Central America

Clusters of mauve flowers, 3-4" in diameter, sepals and petals nearly equal. Easy culture, prefers an abundance of sunlight. Feb.-March.

\$ 5.00

C. TRIANAEI Colombia

Christmas and New Year bloomer. Light lavender flowers.

\$ 5.00

C. WARNERI Brazil

One of the darkest of all of the species; late summer.

\$ 5.00

Orchidglade

C. BOWRINGIANA X. EPI. RADIATUM

We expect something very unusual, especially in flower color. Variable flowering season. $2^{1/2}$

\$ 3.50

CYCNOCHES CHLOROCHILON ("Swan Orchid")

A beautiful species from Panama, having fine flowers for corsages and displays. Produces large leaves during summer, then in late fall flowers are made on the heavy pseudobulbs—large plants producing as many as 15-20 blooms. Flowers are of a heavy, waxy nature, chartreuse in color and about 5" in diameter. \$5-\$6-\$7.50, large specimen priced accordingly.

DIACRUM BICORNUTUM West Indies

A most interesting plant for a collection. Flowers start opening during February' and continue for several months. White, star-like flowers spotted with purple are produced on long spikes. We recommend this plant for those who like fragrance in the greenhouse. The perfume of these blossoms is like that of orange blossoms and particularly fragrant in the morning. Flowering size.

\$10.00

EPIDENDRUM ATROPURPUREUM Panama

Rare Flowers are larger than the type. Sepals and petals brown with lighter borders, lip reddish-mauve. Season April

\$10.00

EPIDENDRUM ATROPURPUREUM

LAELIA PURPURATA Brazil

A spring-blooming Laelia, producing 5 - 7 lavender blooms on the stem. Flowers have a dark labellum.

\$10.00

PERISTERIA ELATA (The "Holy Ghost" Orchid) Panama

This is a large-growing terrestrial orchid preferring a semi-shaded location. In the fall it produces white, waxy flowers, the parts of which portray an image of the Holy Ghost — hence its common name. Application of liquid fertilizers are advantageous during its growing season.

\$10-\$15

RODRIGUEZIA SECUNDA Trinidad

A small plant that adapts itself well to hanging as the scapes are somewhat arching. Flowers during late spring. A most interesting rose-pink color. Easy culture; prefers Cattleya house temperature and light.

3" \$ 7.50 4" \$10.00

VANILLA PLANIFOLIA Central America

This is the plant from which the commercial Vanilla is obtained. It is a vining type and can be trained to climb along the wall or vent shaft. Grown on treefern in 5" pots, \$3.00, 15-18" cuttings \$ 2.50

MODERN POTTING STICK

Here is the potting stick you have been looking for; made of aluminum with a rubber handle, $12\frac{1}{2}$ '' long.

Prepaid anywhere in the U. S. A., only \$3.25

Literature

PHILIPPINE ORCHIDS,	by Reg S. Davis and Mona Lisa Steiner A detailed treatment of some 100 native species.	.\$5.00

YOU CAN GROW OR	CHIDS, by Mary Noble	.\$1.98

hobbyist.

ORNAMENTAL COMPANIONS

Anthurium Andreanum Hybrids

Flowering Anthuriums are very interesting and a beautiful addition to any orchid house. Each flower lasts for several months and as a new leaf opens a new flower develops. Well-grown plants should always be in flower. This plant prefers diffused light, plenty of moisture, good drainage. Colors, red, salmon or pink.

6-7" pots \$10, \$12.50, \$15

ANTHURIUM ANDREANUM

BROMELIADS

Increasingly becoming a favorite group of plants as an addition to the greenhouse or as a plant for indoor decoration. Closely allied to the pineapples, they show heavy foliage in a wide variety of colors and will grow and flower in diffused light.

AECHMEA FASCIATA

Light green plants banded with white tomentose stripes, making rosy-pink flower spikes.

AECHMEA ORLANDIANA

5" \$4.00

Shiny, light green foliage with red-brown stripes. Brilliant orange flower spikes.

NEOREGELIA ZONATUS

4" \$2.50

Dark green foliage with brown-red stripes.

VRIESIA CARINATA HYBRID MARIE 5" \$7.50

Light green foliage. Flat feather-like flowers are strikingly marked with orange-red and yellow, lasting for several months.

AECHMEA ORLANDIANA

Viterature

MORE THAN MEETS THE EYE

The experienced orchid grower knows that one cannot judge the potential quality of an orchid plant by its appearance. The physical appearance of the plant indicates only whether the plant is in good condition, but does not reveal the many hours of thought and the years of care which have been involved to produce quality flowers.

It is necessary, therefore, that you place full faith in the grower from whom you purchase your plants. That is why year after year, our customers call on us again and again to supply their needs. All of our experience is at your service and we hope you will join the ranks of our many satisfied customers.

CONTRACTOR CONTRACTOR

FOLIAGE PLANTS

We are growers of Tropical Foliage plants as well as Orchids.

If you are interested in Tropical Foliage plants for indoor culture, we invite your correspondence.

ORCHID SUPPLIES

POTS

We are agents in the Miami area for orchid pots and offer our customers a complete stock. Pots must be picked up at our nursery except in the case of loads or part loads which we can arrange to have delivered direct from the pottery.

MISCELLANEOUS ITEMS

As an accommodation to our customers, we have the following items available: (Prices F.O.B. Miami)

TUBES AND CAPS (25 of each)	\$1.25	pkg.
POT HANGERS		each
WIRE STAKES (GALVANIZED)	04	each
SLUG DEATH	1.00	box

ALSO

LABELS, POTTING STICKS, INSECTICIDES,
TREE FERN POLES, OSMUNDA

OSMUNDA FIBER

We are continually purchasing good quality osmunda fiber from the men who gather it in the Everglades.

We feel that quality osmunda is necessary to grow quality plants.

We will be pleased to ship to you the best grade of Florida osmunda fiber in lots of one or more bales.

Write for current prices and state the quantity you desire.

"'PYRALIN" ORCHID LABELS

Make Permanent Accurate Records

By using these indestructible labels to identify your orchid plants, you will increase the value of your collection immeasurably.

LARGE SIZE

LC. FRANK LIND
VAR. ORCHIDGLADE
A.M.A.O.S. 1954
LC. HELEN WILMER
X
LC. WINDERMERE

White, actual size \$1.60 per 100; \$15.00 per 1000 Weight 7 ozs. per 100

In addition to having a permanent record of the correct name of each of your orchid plants and any awards which they may receive, the reverse side of the labels offer an 'at hand' record for such pertinent information as potting data, flowering dates, source of purchase, description of blooms and so forth. This label is larger in size than others on the market, which allows ample space for such information.

SEEDLING SIZE

in sheets of 40 labels 25c weight $\frac{1}{2}$ oz. 100 labels weight $\frac{1}{2}$ ozs. 1000 labels \$5.50

CONDITIONS OF SALE

- 1. Orders will be filled in rotation.
- 2. No substitutions will be made on any order either as to size or variety without authorization.
- 3. We do **NOT** make a packing charge.
- 4. Unless otherwise advised, shipment will be made via Railway Express, charges collect. (All orders are F.O.B., Miami.) However, we recommend air express (or air freight on large orders) for shipments destined for countries outside of the United States and for shipments to be made during the winter months when there might be danger of the plants freezing en route.
- 5. Claims for damaged shipments must be filed immediately with the carrier by the consignee. We make every effort to pack carefully, and our responsibility ends when the shipment is accepted by the carrier.
- 6. On the authority of your local plant quarantine station, please advise us if there are any unusual requirements pertaining to the shipment of plants into your territory or country.
- 7. Our firm has been properly authorized to handle shipments to Hawaii. However, the customer must forward with his order his permit number which he must obtain from the Board of Commissioners of Agriculture and Forestry, Honolulu.
- 8. Unless your credit has been established with us, kindly enclose check, money order, or bank draft to cover payment of your order in full.
- 9. NON-WARRANTY: We, JONES AND SCULLY, INC., give no warranty, express or implied, as to the productiveness of any of the plants we sell, and will not be in any way responsible for the crop. Our liability in all instances is limited to the purchase price of these plants.
